Writing/ Part 2: Faris Waleed

1. **In this section, you will develop the given topic**

Topic A

"Traveling in a group is better than traveling individually."
Do you agree?

Write an opinion essay expressing your opinion and justifying your point of view.

Write your response here.

Is traveling in a group better than travel individually? Is travelling in a group safer then traveling individually? I will tell you why traveling individual is better but a little risky it has its benefits and drawbacks but its still better for me.

Traveling alone is better but a bit risky, the risk is that you're alone in a new city / country. The risky is high if you didnt do your research or have someone you know to the place you're going. I say traveling alone has more freedom and less drama from the group, you roam the place freely.

Traveling ~~in~~ alone is way better for the reason I mentioned ahead.
